Sampath Panuganti

Full-stack, Android and AI Developer

Hyderabad, India | sampathpanuganti740@gmail.com | linkedin.com/in/sampath-panuganti | github.com/sampath-M0

Summary

Third-year BTech student building full-stack web, Android and AI-integrated applications through personal and freelance projects. Focused on offline and on-device AI, resilient multi-provider LLM integrations and polished, responsive interfaces.

Skills

Web	HTML5, CSS3, JavaScript, responsive design
Mobile	Kotlin, Jetpack Compose, Flutter
AI	LLM integration (Gemini, Groq), multi-agent systems, offline and on-device AI
Automation and tools	n8n, Git, GitHub, VS Code

Projects

JARVIS Voice Assistant Kotlin, Jetpack Compose

- Built a fully offline, JARVIS-style voice assistant for Android that keeps working without an internet connection.
- Designed the app interface with Jetpack Compose.

AI Router Gemini, Groq

- Built a router that pools multiple free-tier API keys per provider behind one entry point.
- Fails over automatically from key to key, then from provider to provider, when rate limits are hit, so requests keep flowing.

Multi-Agent Incident Commander Generative AI and LLM Applications

- Designed a multi-agent AI system that helps diagnose outages.
- Advisory-only by design: it recommends actions while people make the decisions.

AI Video Automation n8n, Gemini, Pollinations

- Developing local n8n workflows that turn uploaded movies into short clips and upload them to YouTube automatically.
- Using Gemini agents to write stories and scenes, with Pollinations images, for a cartoon video pipeline.

Education

B.Tech, Third Year | DRK Institute of Science and Technology | CGPA: 7.0
